
first flight, its own processes and PyBullet world
Simulator
CF2X, PyBullet
physics 1200 Hz
control 400 Hz
17 numbers
4 actuators
copter_ref
C++ binary
Harness
sample, AHRS view,
tick order, mission
ArduPilot classes
compiled unmodified,
stub headers
recorded run
Per-tick comparison
bit for bit, 4 actuators as flown,
22 values on replay
with --exact --trace
same harness,
line for line
cpp2lean
recorded run
Simulator
CF2X, PyBullet
physics 1200 Hz
control 400 Hz
17 numbers
4 actuators
Harness
sample, AHRS view,
tick order, mission
Translated classes
Lean records,
Inputs, Outputs
copter_lean
Lean binary
second flight, separate, same start and parameter files
